Professional Summary

Computer Science student with strong foundations in Java, Kotlin, Data Structures, and Object-Oriented Programming. Experienced in building mobile and web applications using Android, Jetpack Compose, and React Native, with practical experience in APIs, databases, and modern application development.

Education

MIT School of Computing (MIT-ADT University), Pune

B.Tech – Computer Science & Engineering

2023 – 2027

- CGPA: 8.92 / 10.0
- Coursework: Data Structures, Algorithms, OOP, DBMS, Operating Systems

Experience

Android Development Intern – Prodigy Infotech (Remote)

Jun 2025 – Jul 2025

- Built Android applications using Kotlin and modern Android development practices.
- Implemented UI screens, local data storage, and application logic while working within project deadlines.

Skills

Languages: Java, Kotlin, JavaScript, Python

Mobile Development: Android, Jetpack Compose, React Native

Web Development: React, Next.js, Tailwind CSS

Backend & Databases: Node.js, Firebase, Supabase, PostgreSQL

Tools: Git, GitHub, Android Studio, VS Code

Projects

DabbaMe – Meal Subscription Platform ([Play Store](#) [🔗](#))

2026

- Took over an existing React Native app and implemented a major UI and architecture redesign.
- Reworked core application workflows and business logic for production requirements.
- Released the redesigned app on Google Play Store; 500+ downloads.

LazyNotes – Notes and To-Do ([Play Store](#) [🔗](#))

2025

- Published a notes and task management app using Kotlin, Jetpack Compose, MVVM, and Room.
- Implemented offline data persistence, task management, reminders, and modern Android UI.

Axcen – Developer Project Management Platform ([Live Demo](#) [🔗](#))

2026

- Built a developer-focused platform using Next.js, React, TypeScript, PostgreSQL, and Prisma with GitHub integration.
- Implemented repository analysis, project visualization, task management, and team collaboration features.

Katai – AI PDF Chat Application

2026

- Built an Android AI PDF chat application using Kotlin and Jetpack Compose for questions over uploaded study material.
- Implemented PDF extraction, multi-chat sessions, and AI API integration using PDFBox, Retrofit, MVVM, and Coroutines.
